## Volume Limiting Wired Foam Headphones For Children

Made from a single piece of EVA foam which is  
lightweight, durable and extremely flexible

**Overview:**

Aluratek's Volume Limiting Wired Foam Headphones For Children is the most safe and comfortable pair of headphones for your child. The body of the headphones is made from a single piece of EVA foam which is non toxic and BPA free. EVA foam is lightweight and very durable making the headphones extremely flexible and nearly indestructible while providing maximum comfort to your child. The Volume Limiting Headphones features conforming leather ear pads for hours of wearing comfort and fits most children's heads ages 3 and up. For smaller children, simply snap on the included headband pad to provide a snug fit.

The sound quality is clear and rich with the sound levels never exceeding 85 decibels to protect young ears. The foam headphones can be used with a any portable device with a standard 3.5mm port such as smartphones, tablets, laptops, computers, gaming devices, MP3 players and ereaders. Your kids can listen to their favorite music and play their favorite games at home or in the car. The lightweight and durable design makes the headphones a great choice to pack in your child's backpack for school.
