STORAGE/MICRO SD CARDS

This action camera is compatible with up to 32GB capacity microSD, microSDHC, and microSDXC memory cards. Please check the card speed rating to ensure it is Class 10 or faster. This will ensure the best picture and video quality, especially in high vibration activities.

CHARGING THE BATTERY

When the Aluratek Action Camera reaches 0% during a recording, the device will automatically turn off. The video will be saved to the memory card.

Use the USB cable to connect the action camera with a USB Charger, computer or portable USB battery.

When the Action Camera is charging, the charging indicator light will be on. When the battery reaches 100%, the light will turn off.

USING ALURATEK ACTION CAMERA APP

1. Download the Aluratek Action Camera app from Apple app store or Google Play store.
2. Please go to the [≡] menu and enable "Wifi" setting or press and hold the [up] button for 2 seconds until the wifi logo shown on the screen. Once wifi is enabled, the LED next to the "OK" button will flash yellow.
3. From your smart device, please go to the wifi setting and connect to the camera (WiFi SSID: Sport-cameras, password: 1234567890)
4. Once connected, you are able to view and record what the camera sees from the app.
